

Carlos Vega Rodríguez

Senior Software Engineer & Tech Lead

15+ years of software engineering — from requirement analysis and project scheduling to architectural design and delivery. I lead teams through every phase of the development cycle to ship quality products that meet and exceed expectations. A well-versed front-end web engineer — React, Next.js, Angular — building cross-platform mobile apps in React Native and cloud-native platforms on AWS, with AI-augmented workflows woven through the whole lifecycle.

Experience

Senior Software Developer · 18Techs

SEP 2016 — PRESENT

Freelance / Contract · Remote · React Native · React Query · AWS · TypeScript · Next.js · Angular · React

- Delivered end-to-end product engineering for a portfolio of clients — mobile front ends, cloud back ends, and everything in between.
- Standardized the mobile stack on **React Native** with **React Query** for server-state caching, optimistic updates, and resilient offline behavior.
- Built and operated services on **AWS**, owning deployment, reliability, and observability.
- Embedded AI tooling (Claude, Codex, Cursor) across the full software development lifecycle — from requirements and design to implementation, testing, review, and deployment — accelerating delivery.

// SELECTED CLIENT WORK

SOCIAL munity — Cross-platform community & social media app (iOS + Android) — media capture/upload, reactions, activity feeds, i18n, durable upload queues, and LLM-based content moderation, plus a Next.js admin panel and web invite system.

React Native · React Query · Next.js · AWS · LLM
munity.us ↗

AD-TECH QUAD — Advertising platform for a Stockholm-based ad-tech company — designed and scaled cloud services powering ad delivery and reporting.

AWS · React · Angular
quad.se ↗

MOBILITY Envoy — EV car-sharing app (“Mobility as an Amenity”) — app-based reservations, keyless vehicle access, and property-scoped fleet flows.

Front-End Tech Lead · Informatel Costa Rica

JAN 2016 — SEP 2016

Costa Rica

- Led front-end development as tech lead.
- Re-platformed **Encore Capital Group**'s consumer-facing sites.

Senior Software Engineer · Konrad Group

MAR 2014 — JAN 2016

San Pedro, San José, Costa Rica

- Delivered solutions for **Deloitte Digital**.

Senior Analyst · Accenture

NOV 2012 — MAR 2014

Costa Rica

- Delivered solutions to **SAY Media** and **DuPont**.

Web Developer & Designer · avVenta Worldwide

FEB 2012 — MAR 2014

AI in the Loop

Using AI across the development lifecycle and inside the product — not as a novelty, but as day-to-day leverage: faster delivery, content moderation at scale, and observable, cost-aware LLM features.

- Pair with **Claude** and **Codex** for architecture and refactors; automate pull-request review with **CodeRabbit**.
- Use **Cursor** as a primary editor for AI-assisted, in-context development.
- Build repeatable AI workflows — scaffolding, test generation, and docs — into the team's process.
- Power content moderation in **mUnity** with LLMs — automated classification and triage of user-generated content.
- Instrument **LLM observability** — tracing, evaluations, and prompt/version monitoring across AI features.
- Manage **token utilization and cost** — routing routine work to low-cost models via open-source agents (**OpenCode, Cline**), with budgeting and caching to keep spend predictable at scale.

Education

Bachelor's degree, Computer Software Engineering — Universidad Nacional de Costa Rica

2008 — 2011
